

Thread

Singleton< PeriodicThreadCaller >

PeriodicThreadCaller

```
classDiagram
    class Thread
    class Singleton["Singleton< PeriodicThreadCaller >"]
    class PeriodicThreadCaller
    Thread <|-- PeriodicThreadCaller
    Singleton <|-- PeriodicThreadCaller
```

The diagram illustrates a class hierarchy where `Thread` and `Singleton< PeriodicThreadCaller >` are the base classes for `PeriodicThreadCaller`. The `PeriodicThreadCaller` class is positioned below the other two, with two arrows pointing upwards to its parents. The `Thread` class is on the left, and the `Singleton< PeriodicThreadCaller >` class is on the right. The `PeriodicThreadCaller` class is centered below the space between the two parent classes.
